SPARK was founded under a different name in 1953 and owns the most senior two-meter repeater in the Scranton-Northeastern Pennsylvania area, operating on 146.34/.94 MHz for over 30 years with open access. Incorporated and with its own radio room, ARRL-affiliated SPARK has provided emergency assistance during several disasters.

SPARK members participate in the national SkyWarn system, ARRL/VEC testing program, Field Day each June, and the Pennsylvania QSO Party each October. In 1997, SPARK's 1x1 call sign, W3W, was the nation's first such special-event call sign allocated under a new system.
